

Since I signed up with Indiana's Telephone Privacy law, I can have quiet dinner with my family. I used to get 4 to 5 phone calls a night (not to mention the annoying & long messages left on my answer machine that take all the spaces so nobody can leave any messages.) Occasionally there were some telemarketers get through the system and interrupted our dinner. Although the system is not perfect, it works really well for my family. Please help making the system work better not weakening it. Better yet, bar the telemarketers!
